TECHNICAL INFORMATION

CONDITION MONITORING SOLUTIONS

Applications

- Machine Shaft Position
- Turbine Differential Expansion
- Low profile mounting
- Harsh Environments

Features

- Switch selectable system cable lengths 5m, 7m and 9m.
- LED indication of selected length.
- 3.5mm socket for gap voltage monitoring.
- Double screened cable for high noise immunity.
- Snap lock and shake proof cable connection.
- Low profile driver for easy local integration to machine (Din rail mount opt).
- Excellent repeatability on replacement of probe, extension or driver.

The XPR12 proximity probe system consists of a calibrated probe, extension cable and driver. Utilising the eddy current principle, this combination forms a tuned circuit with the target material and variations in probe face to target distance are detected in this circuit by the driver. This provides a linearised voltage output proportional to target gap with a nominal sensitivity of 1.38 mV/um and a range of up to 12.0 mm. This type of measurement system provides highly accurate (resolution typically to a few micro-meters) relative positional measurements, for harsh environments up to 180 °C.

The driver unit offers selectable system lengths of 5 m, 7 m or 9 m, with a front panel green LED indicating the selected option. The gap voltage monitoring socket assists with commissioning the probe system; a volt meter can be connected directly to the driver through the 3.5 mm standard audio socket to display the gap voltage at the point of installation and the probe mechanical gap can then be adjusted to suite the application.

The cable system incorporates snap lock connectors which require no torqueing and provide a shake proof solution important for heavy industrial applications. The double screened cable offers robustness in combination with high immunity to interference and optional stainless steel convoluted armour is available for applications or environments where cable protection is paramount.

XPR12

System Performance

Measurement Range:	12.0 mm
Linear Range:	0.63 mm (25 mil) to 12.7 mm (500 mil) from electrical null position.
Electrical null position:	Approximately 0.50 mm from target (Driver at 0 V).
Linearity: (% of FS)	± 1%, -1.75 V to -17.5 V ± 2%, -1.0V to -17.5 V ± 2%, 0 °C to +150 °C @ -10.0V
Std Sensitivity:	1.38 V/mm (35 mV/mil) ± 1 %
Resolution:	<0.003 mm
Interchangability:	Maximum interchangability error replacing either probe, extension cable or driver in calibrated system is ± 5 %.
Available system lengths:	5 m, 7 m and 9 m
Cable length tolerance Probe (1 metre): Cable Extension (4 metre) Cable Extension (6 metre) Cable Extension (8 metre)	: 6.0 m to 6.6 m
Frequency Response:	DC to 5 kHz
Maximum Cable Length:	330 m based on 120 pF/m at <10 kHz and 500 um pk-pk. 3000 m based on 120 pF/m at <1 kHz and 500 um pk-pk.

Can be ordered in metric or inches. See Note 2.

Note 1 - Unthreaded Length Option Imperial Case

Unthreaded length must be at least 0.8 inches less than the case length. Order in increments of 0.1 in. Maximum unthreaded length: 7.2 in. Minimum unthreaded length: 0.0 in. Example: 04 = 0.4 in.

Metric Case

Unthreaded length must be at least 20 mm less than the case length. Order in increments of 10 mm. Maximum unthreaded length: 180 mm. Minimum unthreaded length: 0 mm. Example: 06 = 60 mm.

Note 2 - Overall Case Length Option

Imperial Case

Order in increments of 0.1 in. Maximum case length: 8.0 in Minimum case length: 2.0 in Example: 24 = 2.4 in

Metric Case

Order in increments of 10 mm. Maximum length: 200 mm. Minimum length: 50 mm. Example: 06 = 60 mm. XPR12
