## Pyranometer

For reliable entry-level measurement of solar irradiance

**IEC61724 Class C**

**ISO 9060 Spectrally Flat Class C**

**Internal desiccant**

**Analog and digital outputs**

**5 year warranty**

### ISO 9060 & IEC 61724 Class C

If you are looking for reliable solar radiation measurement to comply with ISO 9060 Spectrally Flat Class C and IEC 61724-1 Class C the CMP3 or SMP3 are the right pyranometers to choose. They are compact, light and provide reliable and good quality data in a wide range of operational environments. SMP3 is ideal for efficiency monitoring in small commercial PV installations.

### Internal desiccant

Both models are fitted with a maintenance-free internal drying cartridge to provide stable measurements and have an IP67 ingress protection rating. The pyranometers feature a snap-on white sun shield, integrated leveling and a high quality connector which is supplied pre-wired with 10 m of signal cable for simple installation.

### Analog or digital outputs

CMP3 does not require any power. Incoming solar radiation generates a continuous millivolt output, which is converted in a data logger to irradiance in  $W/m^2$  using the calibrated sensitivity. For easy integration into SCADA systems SMP3 has Modbus® RTU RS-485 serial communication, plus an amplified analog output. The sensitivity is stored inside for standardized outputs and it features improved response time and digital temperature compensation.

### 5 Year Warranty

All pyranometers from the Kipp & Zonen CMP and SMP series come with a 5 year warranty and we have service and calibration centers around the world.
