

ET24 Wireless Telemetry Lift Link Tension Load Cell System

Key Features:

- Capacities From 1 tonne to 500 tonnes
- Wireless Range up to 700 Metres
- Accuracy $<\pm 0.3\%$ of Rated Capacity
- IP65 Environmental Protection
- High Resolution T24-HS Display
- Extreme Battery Life: 600 Hours (Load Cell) 40 Hours (Handheld)
- Low Weight to Capacity Ratio
- Remote Power On/Off
- Ability to use Multiple Link Load Cells and Sum Their Readings to Monitor Total Load (optional)
- Internal Antenna
- Includes Carry Case (75 tonnes and below) / Storage Crate (100 tonnes and above)
- Fast Delivery

For wireless high resolution tension monitoring at distances up to 700 metres

The high accuracy ET24 telemetry lift link load cells are designed for under-hook and lifting gear weighing applications. Manufactured from aluminium gives this load cell a fantastic low weight to capacity ratio. This telemetry system allows for wireless monitoring of up to 700 metres, avoiding the need for excess cabling.

The telemetry lift link's batteries will last up to 600 hours and the handheld display's will last up to 40. The antenna is internally mounted resulting in less chance of breakage.

The ET24 can be used on its own or with up to 100 load cells simultaneously for a multi-point measuring system. The handheld indicator can display the outputs of up to 12 telemetry load cells. By downloading the T24Log100 software you can log up to 100 channels of data.

Options:

- USB Base Station for PC-Based Monitoring & Data Logging
- Analogue Output Module
- Multi-Channel Monitoring and Data Logging Software
- Remote Printer
- Lifting Shackles

Applications:

- Lifting Gear Weighing
- Cable Tension Measurement
- In-line Weighing Applications
- Crane Monitoring
- Under-Hook Crane Weighing
- Towing Force Monitoring
- In-Line Tension Measurement

Specification:

Rated Capacity (RC):	T	0-1, 0-2.5, 0-6.5, 0-12, 0-25, 0-35, 0-55, 0-75, 0-100, 0-150, 0-200, 0-250, 0-300, 0-500
Operating Modes	Tension Only	
Accuracy:	% of Rated Capacity	<±0.3
Operating Temperature Range:	°C	-10 to +50
Safe Overload:	% of Rated Capacity	150
Ultimate Overload:	% of Rated Capacity	500 (up to 75t) / 400 (100t to 300t)
IP Rating (Environmental Protection):		IP65
Construction Material:		Aluminium Alloy
Power Requirements:		Handheld: 2 x AA Battery / Load Cell: 4 x AA Battery
Display Type:		7 Digit 8.8mm LCD
Transmission Range:		700 metres (line of sight)
Display Update Rate:		3 per second

Dimensions (mm):

Ordering Codes:

Part Number	Description
ET24-1t-000-000	1 tonne link load cell, T24-HS display + carry case
ET24-2.5t-000-000	2.5 tonne link load cell, T24-HS display + carry case
ET24-6.5t-000-000	6.5 tonne link load cell, T24-HS display + carry case
ET24-12t-000-000	12 tonne link load cell, T24-HS display + carry case
ET24-25t-000-000	25 tonne link load cell, T24-HS display + carry case
ET24-35t-000-000	35 tonne link load cell, T24-HS display + carry case
ET24-55t-000-000	55 tonne link load cell, T24-HS display + carry case
ET24-75t-000-000	75 tonne link load cell, T24-HS display + carry case
ET24-100t-000-000	100 tonne link load cell, T24-HS display + carry case
ET24-150t-000-000	150 tonne link load cell, T24-HS display + carry case
ET24-200-000-000	200 tonne link load cell, T24-HS display + carry case
ET24-250t-000-000	250 tonne link load cell, T24-HS display + carry case
ET24-300t-000-000	300 tonne link load cell, T24-HS display + carry case
ET24-500t-000-000	500 tonne link load cell, T24-HS display + carry case

Associated Case Study:

[Telemetry Lift Link Load Cells Tip the Scales for Plaxton Bus](#)

A multi-channel system was set up using two ET24-5T and two ET24-12T telemetry lift link load cells, two inclinometers (angle sensors) and a T24-BSu base station. ET24 telemetry load cells were attached to each corner of the bus to monitor the load and the two inclinometers were used to measure the incline. Once the bus was lifted, instantaneous measurements were picked-up by a T24-BSu wireless telemetry base station and the data was transmitted straight to the PC or laptop.
