PyroCouple

General Purpose Infrared Temperature Sensor with Analogue Output

- Temperature ranges from -20°C to 500°C
- Durable, robust stainless steel 316 housing, sealed to IP65
- · Quick and easy installation
- 2-wire 4-20 mA output or 4-wire voltage/ thermocouple output
- Choice of precision optics for large or small targets
- Fast response with high stability
- · Wide range of accessories
- Fixed emissivity 0.95 for measuring non-reflective non-metals, and painted surfaces (including painted or coated metals)
- Conforms to industrial EMC standards

The PyroCouple is a simple, robust infrared temperature sensor with a choice of analogue outputs. No complicated setup is required - just connect a temperature indicator and power supply, and instantly start taking measurements.

It is suitable for non-contact temperature measurement on most non-reflective non-metal surfaces, such as paper, thick plastics, asphalt, painted surfaces, food, rubber and organic materials, among many others.
