

The GLD-M01 portable gas detector adopts advanced gas sensor and large-scale integrated circuit technology to detect leaked gas through natural diffusion. It has excellent sensitivity and repeatability, and is easy to use and maintain.

The shell of the GLD-M01 is made of high-strength engineering plastics. It has a compact appearance and is easy to carry. It has the characteristics of high strength, good hand feel, waterproof, dustproof, and explosion-proof.

Specification

Gas Type	Methane
Operating Principle	Semiconductor
Sampling Method	Natural Diffusion
Measurement Range	0-22,000 ppm
Display	OLED
Alarm	Sound, light and vibration alarm
Operating Time	12 hours
Dimension	L150mm, W45mm, H25mm
Operating Temperature	-30~60℃
Operating Humidity	5-95% RH Non-condensing
Ex Marking	Ex ib IIC T4 Gb

Whilst every effort has been made to ensure the accuracy of this specification, we cannot accept responsibility for damage, injury, loss or expense from errors or omissions. In the interest of technical improvement, this specification may be altered without notice.
